

Important information for insulin users

Production of several insulin products is being discontinued. If you are using one of these, you must switch to another insulin product. Contact your doctor for a new prescription.

The following insulin products are being discontinued:

- Insulatard FlexPen/Penfill
- Actrapid Penfill
- Levemir FlexPen/Penfill
- Novomix 30 Penfill
 - FlexPen will continue to be available.
- Fiasp PumpCart
 - Vials, FlexTouch, and Penfill will continue to be available.

Alternative insulin products are readily available in Norway.

What do you need to do?

Contact your doctor as soon as possible. Switching to another insulin product requires monitoring, and it may take time to determine the correct dose.

Why are these products being discontinued?

Few patients use these insulin products. Therefore, the supplier has decided to discontinue sales throughout Europe in 2026.
